I am an experienced Web Developer and Front-End Engineer with a genuine passion for creating high-quality, impactful web solutions. I am seeking a full-time role with a progressive organisation, ready to contribute immediately, with full work eligibility and no restrictions.

WORK EXPERIENCE

Web Developer

Infusion121 • infusion121.com.au

May 2022 — Present

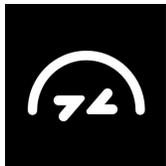

Melbourne, Australia

A Digital Agency with Custom Innovative Solutions. 1-to-1 collaboration creates custom solutions for results-driven challenges

My Role

- ▶ Provide quality web application that supports desktop and mobile responsiveness. Create wireframes and prototypes for the project presentation.
- ▶ Using new Headless approach with SSG in gatsbyjs.
- ▶ Using github & gatsbycloud development environment.
- ▶ Develop headless approach using wordpress and graphql as a backend, and gatsbyjs in the frontend to query data. During the build process, GatsbyJS compiles these components and queries to generate static HTML files for each page of your website.

- ▶ Maintain google pagespeed score to 90+ overall performance
- ▶ Work closely with the design team to discuss the outcome of the website.
- ▶ Implement campaign email that supports different kind of email client.
- ▶ Reviewing code from other team in git open PR. Once done and clear, we will merge it in the main branch.
- ▶ Have a kickstart meeting in the morning every first day of the week.
- ▶ Have a client meeting regarding the build process.
- ▶ Conduct a training for the client to familiarize the CMS of their website.
- ▶ Build a system in the company on how to have an efficient workflow collaboration with the team by having a standard coding, right tools and cloud base development workflows.

Front-end Engineer - Dubai, UAE

zbooni • zbooni.com

Sept 2021 — March 2022 • **7 Months**

Dubai, United Arab Emirates

The next generation SaaS platform for personalized commerce. Drive more sales with a human connection.

My Role

- ▶ Work closely with the Design Team to perform the UI/UX implementation on the web app based on the Figma layout. Make sure that it works perfectly on different browsers and mobile screen sizes. Write clean and modular code using Nextjs, tailwindcss, Gatsbyjs and HTML/SCSS. And use up-to-date NPM packages to support the features.
- ▶ First project was a web app Dashboard that supports desktop to mobile responsiveness. It helps the merchants easily access their product catalogue, export/download invoices, track orders & customers details.

- ▶ Discuss and review code from outsource team in git open PR. Once done and clear, we will merge it in the main branch.
- ▶ Implement campaign email that supports different kind of email client.
- ▶ Improving and building new features in our products to satisfy the customer.
- ▶ Supports other developers that are working on the zbooni website.
- ▶ Have a kickstart meeting in the morning every first day of the week.
- ▶ Have a tech wrap-up meeting in the end of the week.
- ▶ Website optimization using lightHouse tool for improving the speed quality of the web pages. Our goal is to meet 80-100 overall performance score of the website. That will include the First meaningful paint, Avoid excessive DOM Size, Eliminate render blocking, minify html/css/js, preloading images, adding base64 for the first load images and etc...
- ▶ I used sketchapp and figma to export and modify sizes of the elements.
- ▶ Work closely with the design team by suggesting new features.

Sr. Front-end Engineer & Designer

golfscape • golfscape.com

Nov 2014 — 2021 • **7 years**

Dubai, United Arab Emirates

golfscape is an online golf reservation service founded in London. The company provides services to find, plan, and book golf in 50 countries.

My Role

- ▶ Multidisciplinary (Web Developer / Designer) of **golfscape** project.
- ▶ Collaborate with back-end developers and UI/UX designers to improve the usability. Write maintainable and modular code with HTML, SASS, Javascript at the same time following our design pattern MVC.
- ▶ Maintaining the frontend side of our system.
- ▶ Making the website responsive across all multimedia platforms from desktop, to mobile.
- ▶ Improving and building new features in our products.

- ▶ I work closely with the **golfscape** country manager and the other engineers to discuss the features requested by the golf course operators and deliver their expectations.
- ▶ Manage to embed the booking widget safely and successfully to the courses website in different CMS applications.
- ▶ Since I have a background of designing, I collaborate sometimes with the marketing team to create a design and initial graphic concepts for marketing materials of the company such as email campaign and promotions.
- ▶ Website optimization using lightHouse tool for improving the speed quality of the web pages. Our goal is to meet 80-100 overall performance score of the website. That will include the First meaningful paint, Avoid excessive DOM Size, Eliminate render blocking, minify html/css/js, preloading images, adding base64 for the first load images and etc...
- ▶ Creating **golfscaspe Email Templates** from the system to respond the users like Booking Email Confirmations to (members and visitors) Cancellation Booking, Profile Update, Course/User booking Request, New users etc. We have more than 20 Email Templates integrated in the system.
- ▶ Directly talk to the CEO for new features and improvements of our products.
